THE TEMPLE NOT MADE BY HANDS Temple Training – Haarlem 2012

by Ina Cüsters-van Bergen

A physical temple, chapel or church is an example of how you build the Temple of your Soul. When this is consecrated you carry your sacred space with you wherever you go. This is one of the jealously guarded secrets of the mystics, magicians and prophets of old.

This semester we will be putting the building blocks of the Inner Temple in place, and start to work with some powerful techniques that will wire the Inner Building so that the energies can start to flow under full control.

What will you learn?

- This Inner Temple is populated with Inner Plane guides. The first one you will meet is the Hermit. This first guide will teach you to 'Divide the Seas' and to pass through the Wilderness: a metaphorical language to transcend the queries and issues of mundane life, and create space for inspired inner teaching.
- In order to make this journey successfully you will learn magical techniques that enable you to pass through the Stargates of the great Gods of ancient times.
- We will use alchemical images and gradually start to work with the powers of Spiritual Alchemy.
- You will gradually start to work with the magical powers of the Serpent Energy, and you will learn the principles of body energies that are fundamental to working with these forces. You will start raising these energies under full control

- You will learn to balance the forces of polarity inside yourself and in the group during the rituals
- You will be brought into contact with the Inner Plane Masters behind the school.
- You will work in the Cosmic Temples that are at the root of the spiritual teachings around the world.
- We will work with some important hermetic keys that open you up to the powerful inner energies of some well-known myths and visions.
- You continue your work with the building up of your interior castle.

For whom is this training?
